

CognitiveTPG A798II THERMAL RECEIPT PRINTER

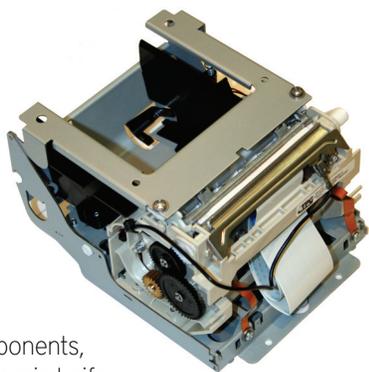

Durable and Reliable Receipt Printing for Retail, Hospitality, and Banking

“Better printer... better price!”

You don't have to settle for stripped down features to get the printer you need at the price you want. The CognitiveTPG A798II Receipt printers offer you more for less. The A798II combines the robust and reliable design with easy loading and set up, fast print speeds, dual motors, now at a low price to fit any budget.

- Fast print speeds at 6 inches per second
- Steel frame and modular design for greater strength and faster delivery
- Longest knife life in industry and unmatched reliability
- Multiple interface options
- Standard 3 year warranty
- Available with Spill Guard option for ultra-harsh environments

Steel frame, metal components,
and self-sharpening ceramic knife

A798II THERMAL RECEIPT PRINTER

PRODUCT HIGHLIGHTS

Fast Printing

The A798II prints a standard 6-inch receipt in one second with sharp 203 dpi clarity.

Rugged and Reliable Design

The printer is often the most stressed component in any POS system. CognitiveTPG avoids vulnerabilities by using solid metal framing and metal components in the A798II printer to ensure optimum reliability and up-time in high-demand applications.

Self-Sharpening Ceramic Knife

Ceramic knives keep their razor sharp edge and do not wear out as easily as other materials. The fact that our printers have a self-sharpening component means their auto cut life will last well beyond the warranty. CognitiveTPG offers the only self-sharpening ceramic knife in the receipt printer market, rated at 3 million knife cuts.

Ease of Use and Versatility

The A798II's easy drop-in paper load and small footprint makes it an easy plug and play installation. For more advanced settings, refer to our website for utilities and downloads.

Increased Spill Resistance

The A798II was designed to withstand conditions in normal retail and hospitality environments where damage can occur. Designed with a liquid dam and unique drainage features, the A798II offers uninterrupted printing. For harsher environments, we also offer an optional Spill Guard accessory.
